TRAINING TESTIMONIALS

I have taken a multitude of different courses with different instructors. The Ronin Tactics Team is top notch and will push you to increase your abilities regardless of your skill level. Both Tu and Tom are great instructors and have clearly spent years developing and innovating their craft and have the innate ability to relay their skills into an easy to learn curriculum. I would highly recommend that anyone wanting to take a course with Ronin Tactics, do so. You will not be disappointed.

The Ronin rifle's is equipped with a 4150 CMV Pro Performance Hanson Profile Barrel treated with a QPQ corrosion resistant finish to achieve ultimate accuracy in any condition. And unlike most rifles, an accurate barrel does not mean a heavy one. In fact, the Ronin Rifle's total weight is 6lbs 9oz. This light weight allows for quick movements, ease in mobility, and assists with fatigue over extended periods of combat.

In the same way, the optimizations for reliability were designed to balance perfectly with consistent recoil management. Assembled with a Surefire MB556 SOCCOM Muzzle Break), a VLTOR A5 buffer system with Spring Co. Enhanced Buffer Spring, and Magpul's SL buttstock, users never have to compromise control with reliability.
